Dear Collaborators,

Time has passed pretty fast since our last meeting and we should identify the items that we pointed out should be accomplished in our last meeting (2007) and make sure they are accomplished.

Please recall the below action items. An assessment of their completion follows.

Here are the next steps (Action Items):

- Recognition of IM effort towards network projects
- Define roles and modes of communications between committees
- Improve accessibility dotProject (Duane-LNO)
- Publish calendar, Create IM forum (email archive)
- Circulate summaries of reports (from meetings and conference calls) - (IM website)

What has been done or started?

In regard to the summary of reports in the IM Web site the attached file shows that the web site, has been fully structured but only about 14 % is populated. Only two grops have published their summaries, ours being one of them.

The IM Web site include a calendar and a forum but neither of those have been significantly populated.

What we don't know if it has been done?

Duane, how is the accessibility of the dotProject?

What has not even begun?

The first two tasks are yet to be further discussed and someone must be appointed to seek that the correct measures are being taken to assure recognitions to the efforts done by IMs to participate in network projects and define roles and modes of communication between the LNO and the IMC members. Any ideas?

Please send me our comments and ideas soon; I want to present them to my colleagues at the IMEXec Winter Meeting that will be held in Feb 12-14. Thanks.

EDA
