LTERMapS 2

Tue, 11/08/2011 - 5:00pm — [tvalentine](#) ^[1]

LTERMapS 2 brings the concept of LTERMapS to the site level. We are starting with 7 pilot sites, and Digital Elevation Models (DEM), watershed boundaries, and stream layers. We also are integrating with SiteDB and Clim/HydroDB. Several efforts are underway including building an ArcGIS Javascript API application for the viewer, and building a SDE database at the LNO. ArcGIS Server version 10 is our web server, and we are building an image server for the DEM's. The current effort is a proof of concept about integrating some baseline GIS data from several sites. Pilot sites are AND, BES, BNZ, KNZ, GCE, NTL, and MCM.
