GIS

The GIS working group is comprised of individuals from within the IM community interested in the curation and use of geospatial data. Current active projects conceived and being developed by the group include LTERMapS [1] (the interactive online network map), GeoNIS [2] (the spatial data module for the NIS), and ESRI2EML [3]. See below for additional information on these projects.

Meeting Notes [4]
GIS Discussion Forum [5]
Related Software Projects [6]

- GeoNIS [2]
- LTERMapS Phase 2 [1]
- IM Buyout: LTER National Atlas PDF [7]
- ESRI2EML [3]
- Best Practices for Documenting Geospatial Data [8]
- 2010 GIS Survey Results [9]

Attachment	Size
GIS Working Group Draft TOR [10]	33.5 KB

Interactive Cartographic Almanac

Attachment	Size
almanac data layers april 2012.docx [11]	43.8 KB
